## Dr. Mark Mandell-Brown recognized for natural figure enhancement

Considering breast augmentation but concerned about looking unnatural? Wishing you could skip the summer months since you prefer not to be seen in swim suits?

Cincinnati's Facial Plastic and Body Cosmetic Surgeon, Dr. Mark Mandell-Brown has perfected his natural figure enhancement.

According to one of the tri-state's "Top Docs" in cosmetic surgery, communication and planning are critical to achieving a natural look.

"I spend approximately one hour with the patient in consultation regarding breast augmentation and other body cosmetic procedures. More importantly, we don't go by cup

size," Dr. Mandell-Brown stated.

Patient Coordinator, Kimberly Washburn, related, "We ask the patients to bring photos from magazines or the internet for the breast size they seek. This helps Dr. Mandell-Brown let them know if the size

Breast augmentation, tummy tucks and liposuction can all be performed at The Mandell-Brown Plastic Surgery Center

is realistic for them." Dr. Mandell-Brown added that the photos, patient's measurements, and how they look with a temporary sizer during surgery help determine the final implant size.

Mary J.'s daughter underwent breast augmentation with Dr. Mandell-Brown. "I can't believe how natural she looks. She fills out her bathing suit and clothes so nicely, but it looks so natural with her new enhancement."

One area gynecologist did a double take when Dr. Mandell-Brown's patient asked him what she thought of her new shape. He related how he sees many women with implants, but was impressed how natural she looked.

Breast Augmentation,

Tummy tuck procedures, and liposuction can all be conveniently performed at the Mandell-Brown Plastic Surgery Center located in Montgomery near Bethesda North. With the amenities of the hospital operating room and the privacy of the office setting, patients are delighted to find they don't have to go to a hospital.

"Our goal is to strive to help every patient feel good about themselves," stated Sharon Swelizer, another patient coordinator at the Mandell-Brown Plastic Surgery Center. Consultations can be made by calling 984-4700 or visiting the web site: [theplasticsurgeryexperts.com](http://theplasticsurgeryexperts.com).

## Need A Lift?

Quick Facelift

At the Mandell-Brown Plastic Surgery Center we recommend the appropriate lift or laser based on your needs and desires.

The Fraxel Laser requires 3 or 4 treatments and improves skin texture, skin pigmentation, and helps restore some collagen for a fresher appearance.

Our Quick Facelift takes around one hour and recovery is 3 to 4 days. This rejuvenates the sagging cheek area and is performed under local anesthesia.

Our Mid Facelift takes around 1 1/2 hours and recovery is typically 4 days. This improves the cheek sagging as well as neck sagging. This is performed with twilight or IV sedation anesthesia.

Mid Facelift

The Mandell-Brown Natural Lift takes around 2 hours and recovery is 7 days. This improves the cheek and neck for maximal restoration for a more youthful appearance. This is also performed with IV sedation or twilight anesthesia.

All procedures are performed at our highly accredited and nationally acclaimed surgery center offering the amenities of the hospital and the privacy of an office setting.

Call 513.984.4700 to schedule your consultation. Find out why more cosmetic patients are seeking the advice and expertise of Dr. Mark Mandell-Brown.
